PROJECTS

LifeGurukul – Online Learning Platform

Led the development of LifeGurukul, a comprehensive online learning platform built with Laravel for the web and developed companion apps for Android and iOS. Focused on seamless user experience, optimised performance, and scalability. Integrated features to support an engaging learning environment across web and mobile platforms.

- **Role:** Led a team of backend and frontend developers
- **Technology:** Laravel, MySQL, Node.js, Cloud
- **Key Features:** Video streaming, WhatsApp notifications, Zapier automation, multiple payment gateways

Tazmin – Online Food Delivery

Developed an end-to-end food delivery platform featuring customer, driver, and manager apps. The solution enables easy food ordering, efficient delivery management, and real-time tracking to streamline the entire delivery process.

- **Role:** Led a team of backend and frontend developers
- **Technology:** Laravel, MySQL, Node.js
- **Key Features:** Live user tracking, real-time data fetching through socket, Chat, Google api's.

EMS – An Online Ecommerce

Built a robust e-commerce platform in Laravel for selling automobile parts, featuring streamlined product browsing, secure checkout, and real-time inventory tracking. The platform enables customers to easily search, order, and track parts, optimizing the purchasing experience for auto enthusiasts and repair professionals.

- **Role:** Developed the admin and websites
- **Technology:** Laravel, MySQL
- **Key Features:** Stripe, QuickBooks invoice, Squareup, Pusher, Websocket

AstroWave – SaaS Web App

Developed a scalable SaaS HRMS web application to streamline HR operations, including employee management, attendance tracking, payroll processing, and performance evaluations. The platform provides businesses with centralized tools for efficient workforce management, improving productivity and compliance.

- **Role:** Developed the admin and websites
- **Technology:** Laravel, PostGresql
- **Key Features:** Stripe, Chat, WebSocket, Automation scheduler tasks

2unboss – SaaS Intranet

Developed an HRMS tailored for a training and certification provider, integrating features like employee training modules, certification tracking, skill improvement programs, and networking through friend-request functionality. Focused on creating an interactive platform to enhance employee development, foster connections, and support continuous learning and professional growth.

- **Role:** Developed multiple modules and features. Optimized entire app.
- **Technology:** WordPress, PHP
- **Key Features:** Bbpress, wpml multi-language, membership, learndash, centralised database, apache echart.

Ethos – Company Branding Solution

Contributed to the development of **Ethos** a platform designed to help companies create and manage brand guidelines to enhance and maintain a cohesive brand identity. Developed features that streamline the creation, customization, and sharing of brand resources, ensuring teams have easy access to consistent brand messaging and visual standards. Focused on optimizing user experience, scalability, and enabling seamless brand alignment across organizations.

- **Role:** Entire app development
- **Technology:** WordPress, PHP
- **Key Features:** Gulp, Google drive api, Zapier, Stripe payment gateway.
